DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, 4, 6, 8-10, 12 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. (4,663,584) in view of Manohar et al. (6,118,266).

Okada et al. disclose the claimed invention except for the transistors being PMOS or NMOS type. Okada et al. disclose in Fig. 4 a current mirror circuit, first transistor (Q1), second transistor (Q2), third transistor (Q3) and fourth transistor (Q4). Manohar et al. teach replacing a PMOS transistor with NMOS transistor or vice versa is well known in the art of current mirror circuits. It would have been obvious to one having ordinary skill in the art at the time of invention to replace a PMOS transistor with an NMOS transistor or vice versa as taught by Manohar et al. in Okada et al. current mirror circuit in order to provide an optimum compliance voltage regardless of input current level and semiconductor parameters.

Allowable Subject Matter

3. Claims 2, 5, 7, 11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the cited prior art disclosed or teaches a current mirror circuit with the four transistors and current source connections.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
